

Crispy Cookies Brushwood «Girolle» production automated machine CAM-2 is designed for production of Girolle confectionery, an analogue of twiglets. The equipment is a compact fully automated complex consisting of the following elements:

- dough dosing systems with a constant dough circulation unit;
- baking systems;
- systems for automatic removal of ready-made products.

Technical specifics	CAM-2
Technical efficiency	
Girolle, Items/hour	Up to 2600 items (weight of one piece is 4 g)
Installed power, kW	16,0
Working power, kW	12
Nominal voltage	400 W, 30 Hz
Compressed air consumption, l/min, max.	400
Baking temperature, C	150-200 1
Number of baking sheets	14
Elements on a sheet, pieces	12
Overall dimensions (LxWxH), mm	2850x2100x1900
Molds material	Aluminium
Molds covering	No
Weight, kg	1000

Ample opportunities:

- High-precision dosing group allows you to minimize the waste rate. At the end, we guarantee a product with precise edges and weight.
- Control over the work of CAM-2 is carried out by one employee. Dough preparation is carried out by a separate specialist.

Control system:

- The line management system is based on two principles:
 - 1) Intuitive interface based on control stand with 10" LCD touch screen.
 - 2) Feedback from operator, according to the principle - "operator's assistant".
- The LCD screen displays animated information about the operation of all nodes in the line.
- List of out-of-order events, to which the control system reacts:
 - 1) Heating alarm
 - 2) Lack of compressed air supply

Ergonomics:

- CAM -2 occupies the minimum space for its performance. Convenient layout of the main working units.
- The CAM -2 has the ability to install a receiving conveyor for finished products.

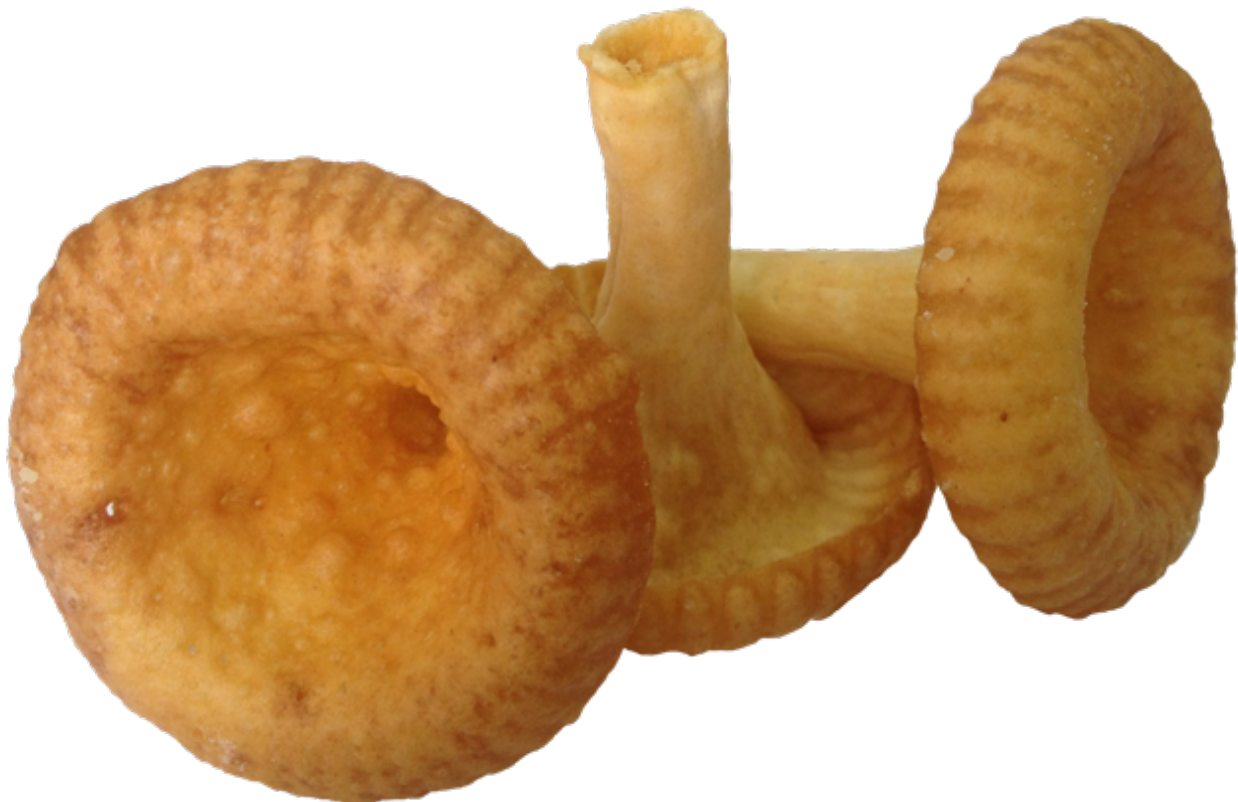

Convenience in operation and maintenance:

- Simple and quick line installation.
- Easy and thorough cleaning of CAM -2.
- Simplicity of setting the operating mode of the equipment.
- Easily transported to another location.

Components:

- Pneumatics from the world manufacturer Camozzi (Italy).
- Industrial fittings from the industry leader Elessa + Ganter (Italy - Germany).
- Professional electronics of companies: Delta (Taiwan), OVEN (Russia), Mitsubishi (Japan), etc.
- High quality powder coating.
- Factory build quality.
